### Driving licence

### About

I believe that good design connects feeling with logic, can solve a problem, sells, and communicates clearly. I am passionate about creating unique, modern, and functional websites and application interfaces. I strongly believe in and let the people who use the product drive the experience. As a UX/UI designer, I love to observe and pay attention to how people use things and constantly work on getting the best human-centered designs for everyday life.

### EXPERIENCE
